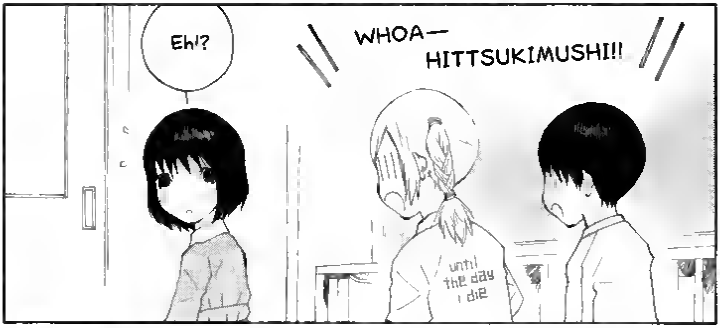
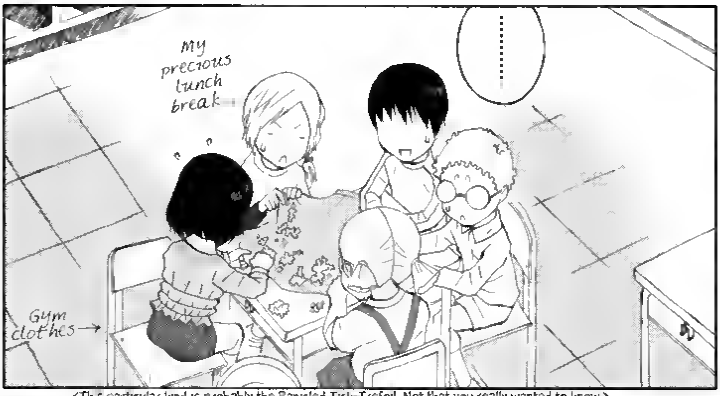
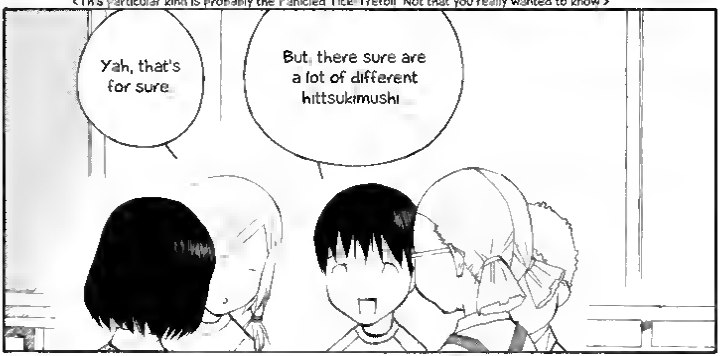
< "Mushi" literally means bug(s) but "hittsukimushi" is used to describe all sorts of plants that tend to stick to people or animals. They're not actually insects >





<This particular kind is probably the Panicled Tick-Trefoil. Not that you really wanted to know>



I know! Why don't we do a special feature on hittsukimushi today, at the Living Things club?
Sure!
That's fine!

After you went to all that trouble and all
Let's go. Let's go.
Okay!
